Dear Parents/carers,

Last year, all pupils were introduced to a number of educational platforms which can all be accessed from home. The children have personal log-ins for Education City, Purple Mash, Mathletics and The Day Explorer. These platforms can be accessed on a tablet, laptop, PC or mobile device.

Year 3 will be trialling completing homework on these platforms. . Homework will be in the form of games, videos and interactive activities and specific activities will be set for the children to complete. The children will be expected to complete their homework on an internet device by a given date. If this is successful, we will be extending electronic homework across the school.

If your child is not able to complete their homework because they do not have access to an internet device, please can you let me know? I will then organise a Friday lunch time club for them to complete their homework.

I will be contacting you at the end of term for your thoughts on electronic homework.

If you have further questions please see Ms Caires (Year 3 – Elm).

Kind regards,
Ms Caires
