

**Friday 18<sup>th</sup> September 2020**

Dear Families,

I will be setting homework on Fridays. This will include a **Phonic** activity and a **Maths** activity.

### **Phonics**

The children have begun learning **phase 2 phonics**. I have included a list of progression for you to follow. You can support your child's learning by purchasing some magnetic letters to aid word building. It would be helpful if you displayed only the learned sounds at first and then add new sounds as we progress through the phase. First step is to identify the sound and then how to form the letter.

### **Letter Formation**

We use the Read Write Inc letter formation to help the children to remember how to form the letters. I have included this.

### **Maths**

The children have been learning how to count accurately using 1 to 1 correspondence. When counting objects please remind your child to line up the objects first and to touch each object only once. Please support your child by using real life objects to count. They can also count what they see as they walk about town or visit the park, etc.

### **Reading**

We will be changing the books on **Tuesdays** and **Fridays**. The children need to hold onto their book until the specified day. You can support your child with reading by reading the book with them, talking about the pictures and asking relevant questions. As the children progress with phonics they will start to identify initial sounds in words and then move on to being able to segment and blend complete words.

### **Next Week**

**For our topic about 'Ourselves,' please send in photos of your whole family. This can include carers, parents, siblings, grandparents, aunties, uncles, cousins and pets. You can send them to me by email at [Jglen@bellenden.southwark.sch.uk](mailto:Jglen@bellenden.southwark.sch.uk).**

**Kind regards**

**Jaki Glen**
