Dear Parents and Carers,

I would once again like to stress the importance about monitoring your child's online activity.

Primary school children should not be accessing any social media as they can prove extremely dangerous.

One such website that is particularly alarming is a free online website called **Omegele** which pairs random unregistered users with each other so they can chat.

In school we are constantly teaching children about responsible use of the internet and how to stay safe when online.

Please can you ensure that all devices at home have parental restrictions on them to further protect your children.

If you need support with this, please contact the school and we can provide assistance.

Many thanks for your continued support.

Kind regards,

**Gregory Doey**

**Executive Headteacher**
